

Xenia AI

Premium Multilingual Guest Concierge

Hotel guest services with intelligent, autonomous support that delivers instant answers in any language.

The Challenge Facing Modern Hospitality

The Problem

- Endless queues at reception desks during peak hours
- Language barriers creating frustration with international guests
- Staff overwhelmed with repetitive routine questions
- Lost opportunities for genuine hospitality moments

The Xenia Solution

- Zero coding required—simply upload your hotel's PDF guide
- Instant answers delivered in any language
- 24/7 autonomous guest support, never closing
- Staff freed to focus on personalised service

Under the Hood: RAG Architecture

Xenia AI combines cutting-edge natural language processing with local document processing to deliver secure, cost-effective guest support.

100% Local Embeddings

HuggingFace all-MiniLM-L6 model ensures cost-effective and secure processing without external API dependencies.

Vector Database

ChromaDB powers semantic search, enabling context-aware responses based on your hotel's specific documentation.

Framework Stack

Built with LangChain for orchestration and Streamlit for an intuitive user interface.

Fault-Tolerant Design

Intelligent fallback logic gracefully handles LLM API rate limits and service interruptions.

Business Value

Data Analytics

Gain insights into guest needs by tracking popular requests, preferences, and frequently asked questions to optimise services.

Drastic Cost Reduction

Local document processing eliminates recurring API fees whilst maintaining accuracy and responsiveness.

Omnichannel Ready

Seamless integration with WhatsApp, Telegram, and lobby kiosks provides guests with familiar communication channels.

Empowering Staff

Free staff from routine enquiries to focus on delivering exceptional, personalised hospitality experiences.
